NSSF SaveQuest — Part C: Business Plan

Prepared for: National Social Security Fund (NSSF) Uganda
Date: June 2026 | **Classification:** Confidential

C.1 Executive Summary

NSSF SaveQuest transforms NSSF from transactional pension administrator to **daily financial companion** for Ugandan workers — supporting Vision 2035 (50% coverage, UGX 50T AUM, 95% satisfaction).

Built by adapting a production-proven platform (433 files, 139 APIs, 26 admin modules), delivery in **18 months** at **~UGX 2.0B** — 43–60% below greenfield cost.

ROI drivers: Smartlife enrollment; contact centre deflection; referral coverage expansion; financial literacy → benefit retention; employer compliance awareness.

Recommendation: Option B — Pilot Programme (UGX 1.41B).

C.2 Strategic Alignment

Vision 2035 Pillar	SaveQuest Contribution
50% Coverage	Referrals, informal onboarding via Telegram
UGX 50T AUM	Smartlife habits, voluntary top-ups, youth culture
95% Satisfaction	Gamified learning, 24/7 Help, fewer branch visits
Financial Literacy	Digital scale (2M+ offline → 5M+ online target)
Informal Sector	Telegram, UGX 5,000 Smartlife minimum

C.3 Market Opportunity

Segment	Size	SaveQuest Role
Current members	3.35M	Retention, literacy, Smartlife upsell
Working population 2035	30M	Coverage expansion
Informal/gig	~12M+	Primary growth
Employers	47,597	Compliance, HR toolkits
Youth 16–25	8M+	Early saving culture

Competitive positioning

Channel	Strength	Gap SaveQuest Fills
NSSF Go	Transactions	No gamification / daily loop
Sanyu	FAQ, balance	No curriculum / social / referral
USSD *254#	Low connectivity	No rich content
FL Programme (offline)	Quality, certified	Limited scale

C.4 Product Roadmap

Year	Theme	Features
Year 1	Launch & Learn	Core 5 tabs, Save Daily, Quiz, Services, Saver Network, admin, pilot → national
Year 2	Grow & Integrate	Employer Leagues, retirement calculator, NSSF Go embed, Luganda, SMS
Year 3	Scale & Innovate	AI savings coach, SACCO/boda partners, churn alerts

---

C.5 Value Model (Conservative ROI)

Driver	Assumption	Annual Value (UGX)
Smartlife enrollments	20K × UGX 50K avg	1B AUM
Contact deflection	50K queries × UGX 5K	250M saved
Referral enrollment	5K formal × UGX 600K	3B AUM
Benefit retention	1% on UGX 500B benefits	5B societal

3-year ROI: ~UGX 2.7B cost vs. UGX 10B+ AUM mobilised → **>3.7× return** before literacy intangibles.

C.6 Go-to-Market

Pilot: Central (formal), Western (agriculture), Northern/Eastern (informal)

National: @NSSFSaveQuestBot, branch QR, employer payslips, #WeBelieveInU campaign, boda union partnerships

Sustained: Monthly Save Challenges, Employer League seasons, Savings Digest syndication

---

C.7 Operations

Governance: DMD Marketing (sponsor), Member Experience (product), CTO (tech), FL Lead (content), Enterprise Risk (data)

Support: SaveQuest AI → Sanyu → 0800 286 773 → Branch

Admin (NSSF): 0.5 FTE content, approval queue operator, monthly analytics to EXCO

C.8 Technology & Security

- Cloud hosting, MongoDB encrypted
- Telegram HMAC + NSSF Go OTP for verified actions
- Data Protection Act 2019 compliance

- Pen test before launch; 99.5% SLA Year 1
- **No blockchain / cryptocurrency / fund custody in SaveQuest**

C.9 Risk Register

Risk	L	I	Mitigation
Low adoption	M	H	Pilot, QR, employers
Regulatory	L	H	Legal review, non-monetary points
Integration delay	M	M	Phased launch
Data breach	L	C	Pen test, encryption
Content inaccuracy	L	H	FL team sign-off

C.10 Financial Projections (3-Year)

Item	Y1	Y2	Y3
Platform investment	2,018M	320M	320M
NSSF staff	60M	80M	80M
Marketing	165M*	100M	80M
Total cost	**2,243M**	**500M**	**480M**
Registered users	200K	800K	2M
Smartlife (cumulative)	20K	80K	200K
FL completions	50K	200K	500K
Est. new AUM	1B	4B	10B+

**Included in Phase 6 build*

C.11 Implementation Timeline

- Month 3: Prototype EXCO approval
- Month 10: Integration sign-off → pilot
- Month 14: Pilot evaluation → national
- Month 16: National launch
- Month 18: First quarterly EXCO review

C.12 IP & Ownership

- NSSF owns all content, branding, configurations
- Source code licence/ownership on final payment (contract-defined)
- Full data export; Telegram bot in NSSF name

C.13 Why Now

1. Smartlife Flexi (Nov 2024) — 9K enrolled month 1; needs engagement infrastructure
2. Vision 2035 — 9 years to 15M members from 3.35M
3. Proven platform — 18 months vs. 30+ greenfield
4. Telegram — informal workers where they are
5. Sanyu maturity — 240K+ interactions; SaveQuest handles learning/social
6. Digital credibility — FiRe Gold 2024; extend to member engagement

---

C.14 Recommendation

Approve Option B (UGX 1.41B): 50K users, 3 regions, 90-day data for full rollout decision.

Next step: 2-hour EXCO briefing + live prototype demo (Phase 1, Week 9).

See Budget (Part A) and Prototype Paper (Part B) for detail.
