NSSF SaveQuest — Prototype Deck Outline

Presentation for: NSSF EXCO / Board
Duration: 45–60 minutes (incl. Q&A)
Format: 24 slides + appendix backup
Brand: NSSF — #WeBelieveInU | Save For Your Dream

Slide 1 — Title

- **Title:** NSSF SaveQuest — Gamified Member Engagement for Vision 2035
- **Subtitle:** Prototype Proposal & Pilot Programme
- **Presented by:** [Organisation Name]
- **Date:** June 2026
- **Visual:** NSSF logo + SaveQuest shield icon mockup

Slide 2 — Agenda

1. Strategic context & Vision 2035 alignment
2. The problem we are solving
3. Introducing NSSF SaveQuest
4. Live prototype demo (10 min)
5. Platform architecture & integrations
6. User journeys (3 personas)
7. Pilot programme & budget
8. ROI & business case
9. Timeline & recommendation
10. Q&A

Slide 3 — Strategic Context

- **Vision 2035:** 50% coverage | UGX 50T AUM | 95% satisfaction
- **Current state:** 3.35M members (11% of workforce), UGX 23.5T+ AUM
- **Gap:** 12M+ informal workers underserved; Smartlife Flexi needs engagement layer
- **MD quote:** *"Creating a willingness to save and building the capacity of Ugandans to save"* — Patrick Ayota
- **Visual:** 50:50:95 infographic

Slide 4 — The Problem

Challenge	Data Point
Benefit dissipation	98% spend benefits within 2 years
Informal sector	85% of gig workers have no retirement savings
Financial literacy	Only ~5% of retirees achieve financial independence
Digital gap	NSSF Go = transactions; no daily engagement loop
Youth	50% of population under 18 — need early saving culture

- **Visual:** Problem statement icons (4 quadrants)

Slide 5 — Why Telegram?

- **2M+ Ugandan Telegram users** — no app-store install
- **Informal sector access** — boda stages, markets, gig workers already on Telegram
- **Low data cost** — lightweight Mini App vs. full native app
- **Proven model** — URAPearls platform live for URA (adaptation, not greenfield)
- **Complements NSSF Go** — engagement layer, not replacement

---

Slide 6 — Introducing NSSF SaveQuest

- **Tagline:** *Save For Your Dream — One Shield Point at a Time*

- **What it is:** Gamified Telegram Mini App for learning, saving habits, referrals
- **What it is NOT:** Payment processor, benefit adjudicator, or balance manager (those stay in NSSF Go)
- **Core modules:** Home | Learn | Services | Earn | Saver Network
- **Visual:** App shell mockup (5-tab navigation)

Slide 7 — Shield Points Economy

Tier	Name	Meaning	Example
White Shield	Instant	Learning & engagement	Daily login, quizzes
Blue Shield	Verified	Admin-approved actions	Contribution proof upload
Gold Shield	Mature	Long-term saver status	12-month Smartlife streak

- **Important:** Non-monetary — badges, certificates, leaderboard status only
- **Visual:** Three-tier shield graphic

Slide 8 — Feature Overview

Module	Key Features
Home	Shield balance, rank, Save Daily streak, action shortcuts
Learn	Financial Literacy modules, retirement journey, Smartlife Flexi education
Services	NSSF portal directory, deep links to NSSF Go, branch locator
Earn	Quizzes, weekly challenges, contribution verify, referrals
Saver Network	District leaderboards, referral champions, invite links

---

Slide 9 — LIVE DEMO

- **Duration:** 10 minutes

- **Flow:**
  1. Open Telegram → NSSF SaveQuest Bot
  2. Onboarding quiz → earn White Shields
  3. Save Daily streak
  4. Financial Literacy module sample
  5. Services → Smartlife Flexi deep link
  6. Help widget → Sanyu handoff
- **Note:** Interactive prototype on staging environment

Slide 10 — Architecture (Conceptual)

```
Members → Telegram / NSSF Go deep links
         ↓
    SaveQuest Engagement Layer
         ↓
    Admin Console (NSSF staff)
         ↓
    NSSF Core Systems (NSSF Go API, Sanyu, Smartlife)
```

- **Principles:** Complement not replace | Data minimisation | Sanyu first for account queries
- **Visual:** Architecture diagram (from Prototype Paper)

Slide 11 — Integration with NSSF Ecosystem

System	Relationship
NSSF Go	Deep links for enrollment, payments, claims
Sanyu	Help widget escalates account queries
Smartlife Flexi	Enrollment & habit activation
Financial Literacy Programme	Certificate sync
USSD *254#	Cross-promotion for low-connectivity users

Slide 12 — User Journey: Boda-Boda Rider

1. QR at boda stage → Telegram bot
2. 3-min onboarding quiz → 100 White Shields
3. Prompt: *"Start UGX 5,000/week with Smartlife Flexi"*
4. Deep-link to NSSF Go → enroll
5. Daily Save Daily streak → Day 7 Blue Shield badge
6. Refer 2 colleagues → district leaderboard

- **Visual:** Journey map (6 steps)

Slide 13 — User Journey: Formal Employee

1. HR sends SaveQuest link in payslip
2. Services → e-statement via NSSF Go
3. Financial Literacy module → certificate
4. Upload payslip → Blue Shield (admin approval)
5. Join Employer League → team quiz competition

Slide 14 — User Journey: NSSF Admin

1. Admin console → review Contribution Verify queue
2. Approve → member gets Blue Shield + notification
3. Publish weekly Save Challenge
4. Analytics: Smartlife enrollments, quiz completion rates

Slide 15 — URA → NSSF Feature Mapping

URA (Source)	NSSF (Adapted)
Pearls	Shield Points
Karibu Daily	Save Daily streak
URA Quiz	NSSF Knowledge Quiz
Tax education	Financial Literacy Hub
URA Services	NSSF Services Directory
Receipt Rush	Contribution Verify
Guild	Saver Network
TON/Blockchain	**Removed**

Slide 16 — Pilot Programme

Region	Focus	Target Users
Central (Kampala)	Formal sector, employers	20,000
Western (Mbarara)	Agriculture, SMEs	15,000
Northern/Eastern	Informal sector, Smartlife	15,000
Total		**50,000**

- **Duration:** 12 weeks post-build
- **Deliverable:** Pilot evaluation report with go/no-go recommendation

---

Slide 17 — Pilot Success Metrics

KPI	90-Day Target
Registered users	50,000
Daily active users	5,000
Smartlife enrollments	5,000
Literacy modules completed	15,000
Referral conversions	2,000
Cost per engaged member	< UGX 3,000

Slide 18 — Budget Options

Option	Scope	Year 1 (UGX)
A — Prototype	POC only	280M
B — Pilot ★	**3-region pilot**	**1.41B**
C — Full Year 1	National launch	2.02B
D — 3-Year	Build + 3 yrs support	2.66B

- **Saving vs greenfield:** 43–60% (UGX 1.5–3.0B)

Slide 19 — ROI Hypothesis (Conservative)

Value Driver	Annual Impact
Smartlife enrollments (20K/yr)	UGX 1B+ new AUM
Contact centre deflection	UGX 250M saved
Referral-based enrollment	UGX 3B+ new AUM
Benefit retention improvement	UGX 5B+ societal value

- **3-year ROI:** Platform cost ~UGX 2.7B vs. UGX 10B+ AUM mobilised → **>3.7× return**

Slide 20 — Implementation Timeline

Phase	Duration	Milestone
Discovery	6 weeks	Requirements sign-off
Prototype	10 weeks	EXCO demo
Full build	20 weeks	Feature complete
Integration	12 weeks	NSSF ICT sign-off
Content	16 weeks	Curriculum ready
Pilot	12 weeks	Evaluation report
Launch	8 weeks	National go-live

- **Total:** ~18 months to national launch

Slide 21 — Risk Summary

Risk	Mitigation
Low adoption	Pilot-first; branch QR; employer mandates
Regulatory (gamification)	Non-monetary points; legal review
Integration delays	Mock data in prototype; phased launch
Confusion with NSSF Go	Clear messaging: SaveQuest = learn; NSSF Go = manage

---

Slide 22 — Governance & Operations

Role	Owner
Executive Sponsor	DMD Marketing & Communications
Product Owner	Head of Member Experience
Technical Owner	CTO (Benoni Katende)
Content Owner	Financial Literacy Programme Lead
Support	SaveQuest AI → Sanyu → Contact Centre → Branch

Slide 23 — Recommendation

1. **Approve Option B** — Pilot Programme (UGX 1.41B)
2. **Appoint executive sponsor** and ICT liaison
3. **Proceed to Phase 0** — Discovery workshops (6 weeks)
4. **Schedule EXCO prototype demo** — Week 9

Immediate next step: Sign Phase 0 + Phase 1 contract (UGX 280M for prototype)

Slide 24 — Thank You / Q&A

- **NSSF SaveQuest** — Save For Your Dream
- **#WeBelieveInU**
- Contact: [Name] | [Email] | [Phone]
- **Appendix available:** Full budget, business plan, prototype paper

---

Appendix Slides (Backup)

A1 — Detailed Phase Budget Breakdown

A2 — Payment Schedule & Milestones

A3 — Technology Stack & Security

A4 — Admin Console Capabilities (26 modules)

A5 — Content Curriculum Outline (40+ modules)

A6 — Competitive Landscape (NSSF Go vs Sanyu vs SaveQuest)

A7 — Boda-Boda Sector Opportunity (1.2M riders, UGX 550B potential)

A8 — Source Platform Inventory (433 files, 139 APIs)

A9 — Team & Resource Plan

A10 — IP & Ownership Terms

Presenter Notes

- **Slide 9 (Demo):** Have backup screen recording if live demo fails
- **Slide 18 (Budget):** Lead with Option B; mention Option A as lower-risk entry if EXCO hesitant
- **Slide 19 (ROI):** Emphasise these are conservative; actual impact likely higher with informal sector scale

- **Timing:** Keep demo to 10 min max; leave 15 min for Q&A

Design Guidelines for Deck Production

- **Primary colour:** NSSF Navy (#0B3D2E or brand green from nssfug.org)
- **Accent:** Gold (#C9A227) for highlights and CTAs
- **Typography:** Clean sans-serif (Arial, Calibri, or NSSF brand font if available)
- **Imagery:** Uganda workforce diversity, mobile phones, savings metaphors (shield, nest egg)
- **Logo placement:** Top-right on all slides except title (centred)

CONFIDENTIAL — For NSSF Internal Review Only. Not for public distribution without written approval.
