NSSF SaveQuest — EXCO Summary (1 Page)

Prepared for: National Social Security Fund (NSSF) Uganda | www.nssfug.org
Date: June 2026 | **Classification:** Confidential — EXCO Review

The Ask

Approve **Option B — Pilot Programme (UGX 1.41 Billion / ~USD 381,000)** to validate **NSSF SaveQuest**, a gamified Telegram engagement platform that drives financial literacy, Smartlife Flexi enrollment, and member referrals — aligned to **Vision 2035 (50:50:95)**.

The Problem

Gap	Impact
Only **11%** of working Ugandans covered (3.35M of ~30M labour force)	Missing 2035 target of **15M members**
98% of beneficiaries spend benefits within 2 years	Retirement poverty persists despite savings
85% of gig workers have no retirement savings	Informal sector remains underserved
NSSF Go handles **transactions** but not **daily engagement**	Smartlife Flexi needs habit-forming activation

The Solution

NSSF SaveQuest — adapt a **proven engagement platform** (URAPearls, already in production for URA) into NSSF's digital ecosystem:

- **Telegram Mini App** — no app-store install; reaches informal workers
- **5 modules:** Home, Learn, Services, Earn, Saver Network (Guild)

- **Shield Points** — non-monetary gamification (White / Blue / Gold tiers)
- **Integrates with:** NSSF Go, Sanyu chatbot, Smartlife Flexi, Financial Literacy Programme
- **Does NOT replace** NSSF Go for payments, claims, or e-statements

---

Strategic Alignment (Vision 2035)

Target	SaveQuest Contribution
50% coverage	Referral engine, informal sector onboarding via Telegram
UGX 50T AUM	Smartlife Flexi habit formation, voluntary top-ups
95% satisfaction	Gamified learning, 24/7 Help, reduced branch visits

---

Budget Options

Option	Scope	Year 1 (UGX)	Timeline
A — Prototype	Proof of concept	280M	10 weeks
B — Pilot ★ Recommended	3-region pilot, 50K users	**1.41B**	14 months
C — Full Year 1	National launch + ops	2.02B	18 months
D — 3-Year	Full build + 3 yrs support	2.66B	36 months

Cost advantage: 43–60% below greenfield build (UGX 3.5–5.0B) by adapting existing platform.

Pilot Success Metrics (90 Days)

KPI	Target
Registered users	50,000
Smartlife Flexi enrollments via SaveQuest	5,000
Financial Literacy modules completed	15,000
Daily active users	5,000 (10% DAU/MAU)
Referral conversions	2,000 new voluntary members

Recommended Decision

1. **Approve Option B** — Pilot Programme (UGX 1.41B)
2. **Appoint executive sponsor** — DMD Marketing & Communications
3. **Assign ICT liaison** — for NSSF Go / Sanyu integration planning
4. **Schedule prototype demo** — Week 9 of Phase 1

Next step: 2-hour EXCO briefing with live prototype demonstration.
