At a glance

- Platform: Telegram Mini App (Next.js 14, MongoDB, Prisma)
- Primary users: Ugandan taxpayers and learners
- Core flows: Register PRN · Pay PRN · Kamisona · Learn · Earn PEARLS
- Status: Production-ready UX with simulated payment integration

Executive summary

- URA PEARLS is a Telegram Mini App for tax education, simulated PRN/payment practice, and reward-based engagement.
- Citizens use Learn, Earn, Quick Access, and Ask the Kamisona without installing a separate app.
- PEARLS (white, blue, golden) recognise participation; admins manage TV, opportunities, and approvals.

Purpose

- Increase awareness of TIN, PRN, filing, and payment steps in plain language.
- Offer safe simulators before citizens use live URA portals.
- Build trust through official URA visual identity and links to ura.go.ug.

Architecture

- Next.js 14 front end inside Telegram WebView.
- API routes + MongoDB via Prisma for notices, TV metadata, user progress.
- Telegram initData validation on comments, pearl awards, and sensitive actions.

Navigation
